

22 February 1974

LLM:

Mr. Ratlift, of the White House) called re Senate bill 2321. He said the NSC would like very much to have some suggested language to replace the last sentence on page 2 of his (meaning you) draft. They would like a sentence which would say something about the present arrangements seems to be adequate or satisfactory and then follow with some statement whereas the changes suggested in the bill would lead to inefficient or would hinder effective management.

He said you can call him on Monday (103-3334)
